Clustered systems must consist of devices in the same hardware series.B. Clustered devices can communicate via either SSH or Cluster Communication Service.C. Clustered devices can communicate only with Cluster Communication Service.D. In-the-cloud devices must be in a separate cluster from on-premise devices.E. Clustered devices can run different versions of AsyncOS.**Answer: AB**QUESTION 153What is a primary difference between the web security features of the Cisco WSA and the Cisco ASA NGFW?A. Cisco WSA provides URL filtering, while Cisco ASA NGFW does not.B. Cisco ASA NGFW provides caching services, while Cisco WSA does not.C. Cisco WSA provides web reputation filtering, while Cisco ASA NGFW does not.D. Cisco ASA NGFW provides application visibility and control on all ports, while Cisco WSA does not.**Answer: D**QUESTION 154Which Cisco ASA configuration command drops traffic if the Cisco ASA CX module fails?A. no fail-openB. fail-closeC. fail-close auth-proxyD. auth-proxy**Answer: B**

QUESTION 155Which Cisco Cloud Web Security Connector feature allows access by all of an organization's users while applying Active Directory group policies?A. a company authentication keyB. a group authentication keyC. a PAC fileD. proxy forwardingE. a user authentication key**Answer: A**QUESTION 156Which Cisco ESA component receives connections from external mail servers?A. MTAB. public listenerC. private listenerD. recipient access tableE. SMTP incoming relay agent**Answer: B**QUESTION 157What is the function of the Cisco Context Adaptive Scanning Engine in Cisco Hybrid Email Security services?A. It uses real-time traffic threat assessment to identify suspicious email senders and messages.B. It provides a preventive defense against viruses by scanning messages before they enter the network.C. It analyzes message content and attachments to protect an organization's intellectual property.D. It protects against blended threats by using human-like logic to review and evaluate traffic.**Answer: D**QUESTION 158The Web Cache Communication Protocol (WCCP) is a content-routing protocol that can facilitate the redirection of traffic flows in real time. Your organization has deployed WCCP to redirect web traffic that traverses their Cisco Adaptive Security Appliances (ASAs) to their Cisco Web Security Appliances (WSAs).The simulator will provide access to the graphical user interfaces of one Cisco ASA and one Cisco WSA that are participating in a WCCP service. Not all aspects of the GUIs are implemented in the simulator. The options that have been implemented are sufficient to determine the best answer to each of the questions that are presented.Your task is to examine the details available in the simulated graphical user interfaces and select the best answer. How many Cisco ASAs and how many Cisco WSAs are participating in the WCCP service?A.

One Cisco ASA or two Cisco ASAs configured as an Active/Standby failover pair, and one Cisco WSA.B. One Cisco ASA or two Cisco ASAs configured as an Active/Active failover pair, and one Cisco WSA.C. One Cisco ASA or two Cisco ASAs configured as an Active/Standby failover pair, and two Cisco WSAs.D. One Cisco ASA or two Cisco ASAs configured as an Active/Active failover pair, and two Cisco WSAs.E. Two Cisco ASAs and one Cisco WSA.F. Two Cisco ASAs and two Cisco WSAs.**Answer: A**Explanation:We can see from the output that the number of routers (ASA's) is 1, so there is a single ASA or an active/ standby pair being used, and 1 Cache Engine. If the ASA's were in a active/active role it would show up as 2 routers.QUESTION 159The Web Cache Communication Protocol (WCCP) is a content-routing protocol that can facilitate the redirection of traffic flows in real time. Your organization has deployed WCCP to redirect web traffic that traverses their Cisco Adaptive Security Appliances (ASAs) to their Cisco Web Security Appliances (WSAs).The simulator will provide access to the graphical user interfaces of one Cisco ASA and one Cisco WSA that are participating in a WCCP service. Not all aspects of the GUIs are implemented in the simulator. The options that have been implemented are sufficient to determine the best answer to each of the questions that are presented.Your task is to examine the details available in the simulated graphical user interfaces and select the best answer. What traffic is not redirected by WCCP?A. Traffic destined to public address spaceB. Traffic sent from public address spaceC. Traffic destined to private address spaceD. Traffic sent from private address space**Answer: B**Explanation:From the screen shot below we see the WCCP-Redirection ACL is applied, so all traffic from the Private IP space to any destination will be redirected. QUESTION 160The Web Cache Communication Protocol (WCCP) is a content-routing protocol that can facilitate the redirection of traffic flows in real time. Your organization has deployed WCCP to redirect web traffic that traverses their Cisco Adaptive Security Appliances (ASAs) to their Cisco Web Security Appliances (WSAs).The simulator will provide access to the graphical user interfaces of one Cisco ASA and one Cisco WSA that are participating in a WCCP service. Not all aspects of the GUIs are implemented in the simulator. The options that have been implemented are sufficient to determine the best answer to each

of the questions that are presented. Your task is to examine the details available in the simulated graphical user interfaces and select the best answer. **Between the Cisco ASA configuration and the Cisco WSA configuration, what is true with respect to redirected ports?** A. Both are configured for port 80 only. B. Both are configured for port 443 only. C. Both are configured for both port 80 and 443. D. Both are configured for ports 80, 443 and 3128. E. There is a configuration mismatch on redirected ports. **Answer: C** Explanation: This can be seen from the WSA Network tab shown below: **QUESTION 161** The Web Cache Communication Protocol (WCCP) is a content-routing protocol that can facilitate the redirection of traffic flows in real time. Your organization has deployed WCCP to redirect web traffic that traverses their Cisco Adaptive Security Appliances (ASAs) to their Cisco Web Security Appliances (WSAs). The simulator will provide access to the graphical user interfaces of one Cisco ASA and one Cisco WSA that are participating in a WCCP service. Not all aspects of the GUIs are implemented in the simulator. The options that have been implemented are sufficient to determine the best answer to each of the questions that are presented. Your task is to examine the details available in the simulated graphical user interfaces and select the best answer. **Which of the following is true with respect to the version of WCCP configured on the Cisco ASA and the Cisco WSA?** A. Both are configured for WCCP v1. B. Both are configured for WCCP v2. C. Both are configured for WCCP v3. D. There is a WCCP version mismatch between the Cisco WSA and the Cisco ASA. **Answer: B** Explanation: ASA version shows as version 2.0; WSA also shows version 2 is being used: **QUESTION 162** What are two features of the Cisco ASA NGFW? (Choose two.) A. It can restrict access based on qualitative analysis. B. It can restrict access based on reputation. C. It can reactively protect against Internet threats. D. It can proactively protect against Internet threats. **Answer: BD!!!RECOMMEND!!!** 1. | 2019 Latest 300-210 Exam Dumps (VCE & PDF) Download: <https://www.braindump2go.com/300-210.html> 2. | 2019 Latest 300-210 Study Guide Video: YouTube Video: [YouTube.com/watch?v=P837tbxE4dc](https://www.youtube.com/watch?v=P837tbxE4dc)
